

SERVICES AND CUSTOM MACHINING

PRE- AND POST-SALES TECHNICAL SUPPORT FOR ALL PRODUCTS WE DISTRIBUTE

SERVICES

Lubricant sampling and analysis
Conveyor belt audits
Classroom and on-site training
Dedicated spare-parts stock

IIOT SERVICES

Rotating machinery condition monitoring
Lubrication management
Compressed-air leak detection
Flange leak detection

BESPOKE MACHINING

Guides, screws, chains and belts cutting and customisation
Valve and air-treatment unit assembly
Lubrication system design consultancy
Made-to-drawing component manufacture
Custom kits

BEARING SERVICES

Repair of large-size bearings
Induction heater hire (including for large components)

MADE-TO-DRAWING SEALS

Technical support for made-to-drawing and special seals
Component 3D prototyping

OVERHAUL OF GEARBOXES AND CARDAN SHAFTS

Gearbox assembly and overhaul
Cardan shaft reconditioning

E-STORE B2B

KEY STRENGTHS:

- 24/7 access
- Orders always given priority for dispatch
- Technical information that is easy to find and immediately available
- Extensive stock availability and a complete product range
- Option to integrate with EDI and with the leading e-procurement and Punch-Out services

Visit our B2B E-Store for urgent orders b2b.bianchi-industrial.it

- Advanced product search**
- Up-to-date technical documentation**
- Order history**
- Booking for heater hire**
- Invoices and delivery notes**
- Shipment tracking**

AUTHORISED DISTRIBUTORS

DRIVEN BY EXCELLENCE SINCE 1921

PRODUCTS AND SPECIALISATIONS

CORRECT SELECTION – CORRECT APPLICATION – BRAND ASSURANCE

THE RIGHT SOLUTION FOR EVERY NEED

Since 1921, 14 branches in Italy, more than 1,000 brands distributed

Bianchi Industrial is a privately owned company within the Bianchi Group. As a European leader in specialised industrial distribution, it has extensive experience serving industry across a range of sectors, together with in-depth knowledge of products and application requirements.

Bianchi Industrial provides customers with the technical consultancy they need to select and size the most suitable component for any application. This is made possible by a team of more than 20 specialist engineers. We are able to recommend the most innovative solutions, ensuring continuity for even the most complex industrial processes.

Our consultancy continues through installation support and on-site training. We also recommend the most appropriate predictive maintenance systems, thereby reducing intervention costs and the number of plant stoppages – all to the benefit of productivity.

BEYOND QUALITY: BRAND ASSURANCE

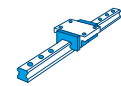

Bianchi Industrial has always been committed to combating counterfeiting, working alongside market-leading manufacturers.

As confirmation of its ongoing commitment to customers, it applies the B.O.C. (Bianchi Original Components) seal to every shipment, safeguarding the guaranteed origin of the components supplied throughout the entire distribution network.

- 1. Purchases only from verified sources**
The manufacturer places an identification code on the goods. Bianchi Industrial purchases only at source or from official distributors that can prove they have bought directly from the manufacturer.
- 2. Thorough checks**
Bianchi Industrial systematically checks the codes of every product received and verifies its contents. Only premium original components are allowed into our logistics hubs.
- 3. Seal**
Only at the end of the process does Bianchi Industrial apply the seal to the packaging of products that have passed all checks, giving customers certainty about what they are buying.

LINEAR MOTION

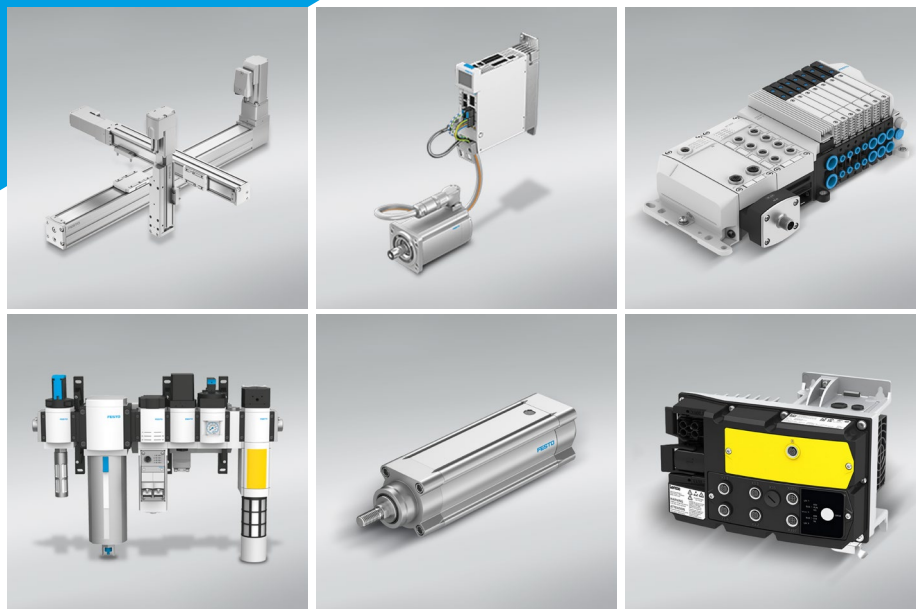

Ball splines
Recirculating ball and roller linear guides
Linear ball bushings
Miniature ball linear guides
Supports and accessories for ball bushings
Precision linear units
Planetary roller screws
High-helix (long-lead) ball screws
Rolled and precision-ground ball screws
Self-lubricating, maintenance-free screws and guides
